

Md. Mushfiqur Rahman

Full-Stack Software Engineer

nehalmushfiq@gmail.com · +880 1735728887 · Dhaka, Bangladesh · Portfolio · GitHub · LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building and shipping production web applications — from a real-time chat platform serving live users to an AI-powered scholarship discovery platform with organic traffic from day one. Comfortable across the stack: Node.js and Express backends, React/Next.js frontends, PostgreSQL and MongoDB databases, and cloud deployment on DigitalOcean and Vercel. Published researcher and hackathon finalist with a track record of completing projects end-to-end.

TECHNICAL SKILLS

Backend & Web: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Redis, SQL Server

Frontend: Next.js, React, TypeScript, HTML, CSS, JavaScript ES6+, Bootstrap, Tailwind CSS

Architecture & Practices: RAG Systems, Vector Search (pgvector), REST API Design, MVC, Dependency Injection, SOLID Principles, OOP

Cloud & DevOps: Git, Docker, Postman, CI/CD, Azure, DigitalOcean, NeonDB, Cloudflare, Vercel

Competitive Programming: Codeforces — 650+ problems solved (Max Rating: 1230)

PROFESSIONAL EXPERIENCE

Software Engineer Intern

January 2026 – April 2026

Syftet Limited

- Built and maintained REST APIs using Node.js and Express.js for production features used by real clients
- Collaborated with senior engineers on full-stack feature development within an agile team workflow
- Wrote and reviewed code across backend services, contributing to multiple release cycles

RESEARCH & PUBLICATION

“Task-Efficient Framework for Sentiment Analysis of Bangla E-commerce Reviews using Transformer”

Published in Springer Nature (ICRTCIS 2025, AIS, Chapter 4) — DOI: 10.1007/978-3-032-09832-0_4

Presented at ICRTCIS 2025, Arya College of Engineering & I.T., Jaipur, India

SELECTED PROJECTS

BairePorbo — AI-Powered Scholarship Platform

[GitHub](#) | [Live](#)

Scholarship and higher-study discovery platform for Bangladeshi students, built and launched independently. Grew to 80+ email signups organically within weeks of launch with no paid promotion.

- Designed and implemented a RAG pipeline using pgvector (HNSW index) and OpenRouter-hosted LLMs for AI-assisted scholarship search and mentoring
- Migrated infrastructure from Supabase to NeonDB + Clerk + Cloudflare R2, reducing recurring costs to near-zero while maintaining full feature parity
- Built admin management tools, authentication flows, and a CDN-backed file storage system end-to-end

Stack: Next.js, React, TypeScript, NeonDB (PostgreSQL + pgvector), Clerk, Cloudflare R2, OpenRouter, Redis

Tong — Real-time Messaging Platform

[GitHub](#) | [Live](#)

Full-stack chat application with real-time messaging, group chats, media sharing, OTP-based authentication, and live presence tracking.

- Implemented WebSocket-based real-time communication with Socket.io, supporting group rooms and online/offline presence
- Deployed on DigitalOcean with Docker for a containerized, reproducible production environment

Stack: Node.js, Express, Socket.io, PostgreSQL (Prisma), MongoDB, Redis, React, Cloudinary, Docker, DigitalOcean

GrowStack — Personal Growth Journal App

[GitHub](#) | [Live](#)

Full-stack journaling platform with community feed, streak tracking, push notifications, and OAuth login.

- Integrated Google and Facebook OAuth using Passport.js alongside JWT-based session management
- Built streak tracking and community feed features with Mongoose, Multer, and ImageKit for media handling

Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Passport.js, Multer, ImageKit, Vanilla JS, Vercel

EDUCATION

B.Sc. Engg. in Computer Science & Engineering

May 2026

Jashore University of Science and Technology

CGPA: 3.44 / 4.00

ACHIEVEMENTS & PARTICIPATION

- **Finalist** — BUBT IT Club INNOVATEX Hackathon 2025
- **Top 50/538** — SOLVIO AI Hackathon 2025
- **Rank 56/200** — Datathon KUET (2025)
- **Paper Presentation** — ICRTCIS 2025, Arya College, Jaipur, India

CERTIFICATIONS

- **Python with Machine Learning** (80 hours) — CSE, JUST (EDGE Project, ICT Division)
